

Community Banks TRUST Network Innovations

"The Network Innovations team assisted us with a couple of large projects over the course of last year and I was very pleased with the result. They

were there to help us from the design stage through the implementation and were always very receptive and professional. The one thing that really sticks out in my mind that separated my experience with Network Innovations from other companies that I have dealt with was their customer service. They were always very friendly and always willing to help us out with any question or concern we had. I was also very pleased with their approach that the project did not end at the time of implementation. They have helped us with training and ongoing support even after the final piece was installed and bill was paid. I would not hesitate to make them my number one choice for any future projects that occur."

Todd Coates,
First Option Bank

"We are experiencing a night and day improvement from the struggles we had with our old system. We couldn't be happier with the choice to go with Network Innovations. They have provided excellent service supporting us in every possible way, including training, and even provided email and phone support 24 by 7 at no charge."

Paul Newman,
Citizens Bank, N.A.

"Implementing the Altigen VoIP phone system was one of the best technology investments we have made. Not only did it improve the communication we had with our customers but also within the company, at our three locations. Network Innovations assisted in the install and has been a great resource to go to for questions and configuration abilities. Since our original purchase in 2005, we have purchased an additional Altigen system for a new branch in Las Vegas, and plan on getting another down the road to bring in other remote branches; from Network Innovations."

Derek Randecker,
First State Bank

"We were growing and wanted all our locations to be able to dial any extensions in any branch, avoid long distance and to do all that using our current network. Our dependence on outside vendors, and the associated costs, has been reduced by over 80% since we implemented Altigen"

Billie Daugherty,
Resource Bank
